Video Systems that Work!™

09-15 11:36:26 390

Thinking About Video Surveillance ?

- ◆ Protect Your Property
- ◆ Limit Your Liability
- ◆ Improve Security
- ◆ Upgrade your Existing System
- ◆ Need Peace of Mind

*... WE HAVE A QUALITY VIDEO
SURVEILLANCE SOLUTION*

for your small business, garage or home...

Small Business, Garage, Home or Lake Cottage Security Video

GuardDog Surveillance Systems well understands security requirements differ. Likewise, it is necessary to provide solutions for every budget. When you visit our website www.guarddogsurveillance.com in the Video Systems we've provided a well rounded discussion on the subject of **Stand-Alone vs. PC-Based Digital Video Recorders**. The summary of that discussion is...

- Both are functionally similar though they differ with respect to how they perform, the features they provide and their relative ease of use, flexibility and ability to integrate with other equipment and/or systems,**
- The heart of every video security system is the DVR, and,**
- There is a worthy purpose and place for both types of systems.**

GuardDog's Small Business, Garage, Home or Lake Cottage Video Security Systems are designed for the applications where securing property on an economical basis is of primary importance and where high volume access (viewing, retrieving, copying, etc.), video is not necessary.

Our packaged system provides exceptional video quality, can be configured with up to eight (8) cameras, is delivered with a full set of instructions and is designed to be installed by the average user with simple hand/battery powered tools (our professional installation is optional).

We've selected cameras that are widely functional for indoor or outdoor use – each are Infrared (I/R) equipped for daylight for night-vision operation. An optional camera (with a narrow field of view 9mm-22mm zoom lens) is available for long range subject viewing and recording.
